Exp No:3.a Conduct an experiment to show data visualization using line plot

Aim:

To Conduct an experiment to show data visualization using line plot

Description: Take any sample data either through csv file or data fetched directly through code.

Code:

```
import matplotlib.pyplot as plt

Overs=list(range(5,51,5))

Indian_Score=[20,50,90,128,170,190,239,270,310,350]

Aus_Score=[28,75,95,120,145,172,195,220,255,279]

plt.plot(Overs,Indian_Score,color='darkblue',label='INDIA')

plt.plot(Overs,Aus_Score,color='yellow',label='AUSTRALIA')

plt.title('INDIA VS AUSTRALIA')

plt.xlabel('Overs')

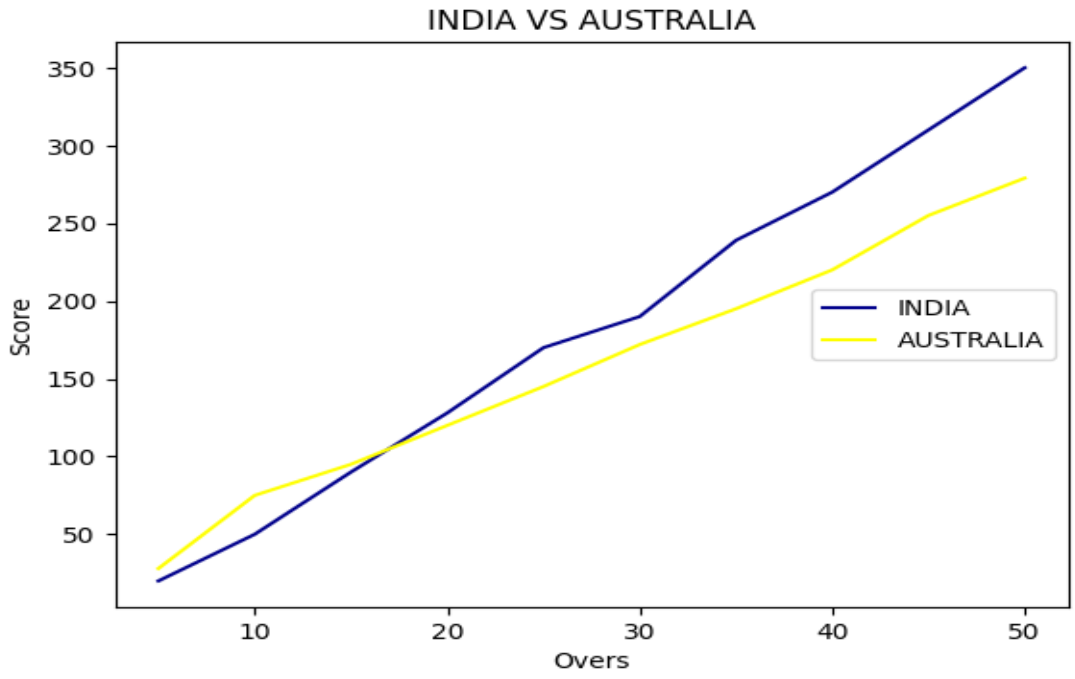

plt.ylabel('Score')

plt.legend()

plt.legend(loc='center right')

plt.show()
```

Output:

Exp No:3.b Conduct an experiment to show data visualization using bar chart.

Aim:

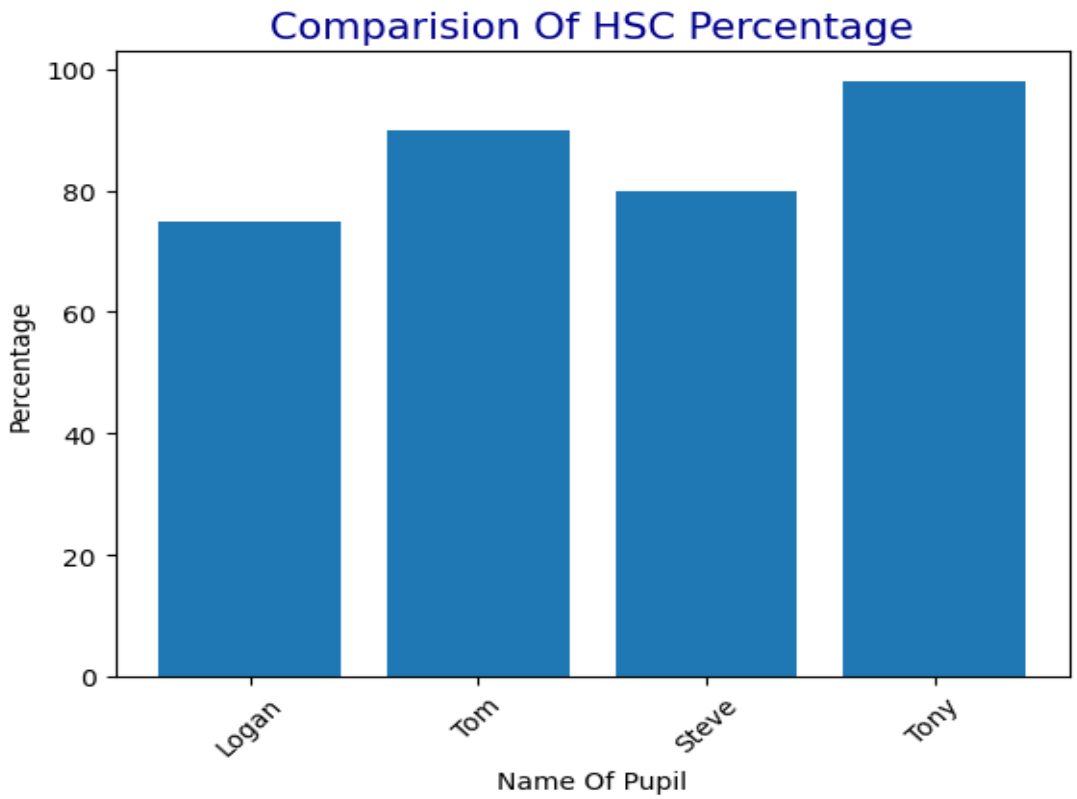

To Conduct an experiment to show data visualization using bar chart.

Description: Take any sample data either through csv file or data fetched directly through code.

Code:

```
import matplotlib.pyplot as plt
import numpy as np
Names = ['Logan','Tom','Steve','Tony']
axis = np.arange(len(Names))
percent = [75,90,80,98]
plt.bar(Names,percent)
plt.xticks(axis,Names,rotation = 45)
plt.xlabel('Name Of Pupil')
plt.ylabel('Percentage')
plt.title('Comparision Of HSC Percentage',fontsize = 15,color='darkBlue')
plt.show()
```

Output:

Exp No:3.c Conduct an experiment to show data visualization using pie chart.

Aim:

To Conduct an experiment to show data visualization using pie chart.

Description: Take any sample data either through csv file or data fetched directly through code.

Code:

```
import matplotlib.pyplot as plt

label=['Computer Science And Engineering','Electronics and Communication Engineering','Information Technology','Civil engineering']

sections=[13,8,5,2]

color=['skyblue','green','purple','brown']

explode1=[0.1,0,0,0]

plt.title('Department Sections')

plt.pie(sections,labels=label,colors=color,explode=explode1,autopct='%0.2f%%')

plt.show()
```

Output:
